Add Roles and Features Wizard

Add features that are required for Active Directory Domain Services?

You cannot install Active Directory Domain Services unless the following role services or features are also installed.

- [Tools] Group Policy Management
 - Remote Server Administration Tools
 - Role Administration Tools
 - AD DS and AD LDS Tools
 - Active Directory module for Windows PowerShell
 - AD DS Tools
 - [Tools] Active Directory Administrative Center
 - [Tools] AD DS Snap-Ins and Command-Line Tools

☒ Include management tools (if applicable)

Add Features Cancel

DESTINATION SERVER
WIN-IV6UKDRLEFR

Directory Domain Services (AD DS) stores information about users and groups on the network and makes this information available to users and applications. AD DS is used by network administrators to give users access to permitted resources anywhere on the network through a single logon process.
